It happens even to the most runaway writers, and it probably happened to you: Suddenly the right word seems just out of reach. You know what you want to express, or just the opposite of what you want to express, but to find just the right synonym or antonym, you need to turn to the faithful thesaurus. And, thanks to the Internet, finding the perfect word to convey what you want to say no longer requires a massive book. Many synonyms and antonyms are only in one click. Just make sure you're not guilty of any of these hilarious examples of how not to use thesaurus. The internet also makes it easy to find the most popular of these online searches. According to the team at thesaurus.com, the word that people searched for synonyms most often in 2019 was ... Seriously! Perhaps people were motivated by the recent coronation of singer John Legend as the world's sexiest man by People magazine. Some popular synonyms for sexy, if you find yourself with a similar request, are hot, enticing, risk and provocative. Different make the best choice depending on whether you hope to convey the positive or negative connotation of the word. Perhaps even more surprising, sexy is usually not a word at the top of the list. According to thesaurus.com's senior science editor John Kelly, he jumped from the 86th place he was in 2018! In other words, consisting of the top 20 synonyms of the search for the year, however, is certainly a little more understandable. The second-best surf was good, also the 2018 winner: it is clear that people are looking for alternatives to this whole positive indicator. Like a good one, about half of the words in the list of 20 often use adjectives, handles, that could use a little spicy up. In addition to being sexy and good, wordsmiths also sought synonyms for words such as happy, beautiful and bad. Several verbs, such as understand, and a few words that can be both verbs and nouns, such as experience, change and show, also made the list. Check out the full list below. As for antonyms, these popular searches tended to be less banal words and more conceptual. This is most likely because people don't necessarily want to replace a simple, generic word with more interesting ones, as they usually do for synonyms, but rather express something that is very much not a concept that they are more familiar with. I bet you never knew that these 20 words were their own opposites. To find this list, we turned to SEMrush, whose software has found the top 20 search queries, in Google USA, containing the word antonym during 2019. For antonyms, the main search was the opposite of the benefit. Some of the most popular antonyms for benefit as a verb are to discourage, degrade, and harm. In the Form, you can use words such as damage or obstruction. Teh Teh The benefit form, which is beneficial, also makes the list, hitting seventh place. Other words that clearly belong as part of the pair, both precursor and before, but their opposites are a little less known. The only word to make both lists was, interestingly, the support that was the third most searched antonym and the tenth most popular synonym. Now that you're an expert on the synonyms and antonyms of 2019, boost your word wisdom even more with these pairs of words everyone thinks are synonymous, but in reality it's not. Roman Motizov/Shutterstockphotogl/Shutterstock/Jose Luis Pelaez Inc/Shutterstock/Getty Images Students who are learning multiplication for the first time often have difficulty with this operation. Let's show students that multiplication is essentially a quick way to add groups. For example, if they have five groups of three balls each, students can solve this problem by determining the group amount: 3 and 3 and 3 and 3. If students know how to reproduce, however, they can calculate much faster that five groups of three can be represented by an equation of 5×3 , which is equal to 15. The free sheets below offer students many opportunities to hone their multiplication skills. First, print the multiplication table in slide 1. Use it to help students learn their multiplication facts. Subsequent slides have print editions that give students the opportunity to practice one- and double-digit multiplication facts up to 12. Use manipulative elements, physical elements such as gummy bears, poker chips, or small cookies- to show students how to create groups (like seven groups of three) so they can observe in a specific way that multiplication is just a quick way to add groups. Consider using other learning tools such as flash cards to help improve student multiplication skills. Multiplication chart. Print PDF: Multiply Chart Print multiple copies of this multiplication table and give one to each student. Show students how the table works and how it can be used to solve multiplication problems in subsequent sheets. For example, use a chart to show students how to solve any multiplication problem to 12, such as $1 \times 1 \times 2$, 7×8 and even $12 \times 12 \times 144$. Random Sheet 1. Print PDF: A one-minute drill this sheet containing unambiguous multiplication is perfect for giving students one minute exercise. Once students have learned the multiplication table from the previous slide, use this print as a preliminary test to see what the students know. Just hand out the print to each student and explain that they will have one minute to answer as many multiplication problems as they can. When students complete a one-minute sheet, you can write down their scores in the top right corner of the print. Random sheet 3. Print PDF: The practice of one-time multiplication after Students completed minute exercises with previous slides, use this printed to give them more practice practice unambiguous multiplication. As students work problems, circulate around the room to see understands the multiplication process and which students lack in additional learning. Random sheet 4. Print PDF: More single-adult multiplication No method works better for teaching students than repetition and practice. Consider providing this print as a homework assignment. Contact your parents and ask them to help by having a one-minute exercise for their children. It shouldn't be hard to get parents to get involved as it only takes a minute. Random sheet 5. Print PDF: Single-million drilling This printed is the latest in this series, which contains only unambiguous multiplication. Use it to give a last minute drill before moving on to more difficult multiplication problems in the slides below. If students are still struggling, use manipulatives to reinforce the concept that multiplication is only a quick way to add groups. Random sheet 6. Print PDF: The one- and double-digit multiplication this printed introduces double-digit problems, including several problems with 11 or 12 as a factor - the numbers that you multiply together to calculate the product (or answer). This sheet may intimidate some students, but it doesn't have to be complicated for them. Use the No. 1 slide multiplication chart to see how students can easily get answers to problems related to 11 or 12 as factors. Random Sheet 7. Print PDF: One- and double-digit drilling Use this printed to give students another minute of drilling, but in this case the problems have one- or double-digit factors. In addition to several problems with factors 11 or 12, several problems have 10 as a factor. Before you give the exercise, explain to students that to find a product of two numbers where one of the factors is 10, just add zero to the number multiplied by 10 to get your product. Random Sheet 8. Print PDF: Homework one- and Two-Digit Drill This printed should be a confidence enhancer for students as they continue to improve their level of knowledge with multiplication facts. It contains only two double-digit problems, both with 10 as a factor. So it would be a good sheet to send home as homework. As before, involve parents to help their children hone their math skills. Random Sheet 9. PRINT PDF: Random one- and double-digit problems use this print as a cumulative score test to see what students have learned by this point. Students have their multiplication tables stacked. Don't give this test as a minute exercise. Instead, give students 15 or 20 minutes to complete the sheet. If students show that they have learned their multiplication facts pretty well, go for the follow-up sheets. If not, see how to solve problems and let the students repeat some of the previous sheets. Random sheet 10. Print PDF: Random Problems Review If Students Are Students struggled to learn their multiplication facts, to use this sheet of random one- and double-digit problems as a review. This printed should be a confidence enhancer, since most of the problems it contains are unambiguous, and only double-digit problems include 10 as a factor. 2 Times tables. Print PDF: 2 Times Tables This print is the first in this series that uses the same factor, in this case, the number 2 in each problem. For example, this sheet contains problems such as 2×9 , 2×2 and 2×3 . Repeat the multiplication table and start walking through each column and chart row. Explain that the third row across and the third row down contain all the multiplication facts 2. 3 Time tables. Print PDF: 3 Times Tables This printed gives students the opportunity to practice multiplication problems where at least one factor is the number 3. Use this sheet as a homework assignment or for a minute's exercise. 4 Time tables. Print PDF: 4 Times Tables This printed gives students the opportunity to practice multiplication problems where at least one factor is the number 4. Use this sheet as a homework item. This provides an excellent opportunity to allow students to practice at home. 5 times the tables. Print PDF: 5 Fold Tables This printed gives students the opportunity to practice multiplication problems where at least one factor is the number 5. Use this sheet as a minute's exercise. Six time tables. Print PDF: 6 times table This printed gives students the opportunity to practice multiplication problems where at least one factor is the number 6. Use this sheet as a homework assignment or for a minute's exercise. 7 time tables. Print PDF: 7 Fold Tables This printed gives students the opportunity to practice multiplication problems where at least one factor is the number 7. Use this sheet as a homework assignment or for a minute's exercise. 8 time tables. Print PDF: 8 Fold Tables This printed gives students the opportunity to practice multiplication problems where at least one factor is the number 8. Use this sheet as a homework assignment or for a minute's exercise. 9 Times Tables. Print PDF: 9 Fold Tables This printed gives students the opportunity to practice multiplication problems where at least one factor is the number 9. Use this sheet as a homework assignment or for a minute's exercise. 10 Times tables. Print PDF: 10 Times Tables This printed gives students the opportunity to practice multiplication problems where at least one factor is the number 10. Remind students that to calculate any product, just add zero to the number multiplied by 10. Print PDF: Doubles Times Tables This printed feature doubles the problem where both factors are the same number, such as 2×2 , 7×7 , and 8×8 . This is a great opportunity to view the multiplication table with students, times tables. Print PDF: 11 Times Table It's especially problems where there is at least one factor of 11. Students may still be intimidated by these problems, but explain that they can use their multiplication tables to find the answer to every number on this sheet. Tables 12 times 12 times tables. Print PDF: 12 Times Tables This printed offers the most complex problems in the series: Each problem includes 12 as a factor. Use this print several times. On the first attempt, let students use their multiplication tables to find products; On the second, students solve all the problems without the help of their multiplication chart. On the third attempt, give students one minute of exercise using this seal. Print.
